14:45 Shipper panel: How does fluctuating availability of all modes of transport affect the behavior of buyers of logistics services?

In recent years, in the present and probably also in the future, crises are increasingly influencing the demand for and supply of logistics services. Sometimes buyers are in a bad position, sometimes in a good position in relation to service providers. Long-term planning is hardly possible, let alone realistic. This panel will analyze and discuss the effects this has on the relationship, cooperation and purchasing strategies.
